## SUMMARY

Motivated and detail-oriented Software Developer with a strong foundation in **C#, SQL, HTML, CSS, JavaScript**, and relational database management. Passionate about developing efficient, user-friendly web applications and solving real-world problems through clean, maintainable code. Quick learner with strong analytical and problem-solving skills, familiar with OOP concepts and **SDLC**, and eager to contribute to a dynamic software development team while continuously expanding expertise in modern technologies like .NET Core and React.

## CORE SKILLS

- **Programming Languages:** C, C++, C#, JavaScript
- **Web Technologies:** HTML, CSS
- **Database:** SQL, SQL Server
- **Tools:** Visual Studio, Visual Studio Code, SQL Server Management Studio (SSMS)
- **DevOps & Version Control:** Git, GitHub, Jira, Jenkins, Azure DevOps, CI/CD
- **API Development:** REST API, Postman
- **AI Tools:** GitHub Copilot, ChatGPT, Claude AI

### PROJECT : ERP (AICTE Website Clone) Front-End Development

Personal Project | 2025

- Designed and developed responsive, cross-browser compatible front-end web applications using **HTML5, CSS3**, and **JavaScript**, including a full clone of the AICTE website with multiple structured pages.
- Built semantic, accessible page layouts with consistent navigation, applying responsive web design (RWD) principles using **CSS Flexbox, Grid**, and media queries across desktop, tablet, and mobile devices.
- Implemented DOM manipulation and event-driven JavaScript functionality to create interactive UI components, including form validation and dynamic content rendering.
- Developed a console-based Calculator Application in C, applying switch-case logic, functions, and conditional statements to strengthen core programming and problem-solving skills.
- Followed clean, modular coding practices across projects to improve code readability, reusability, and maintainability..

### ERP (Student Management System) *Back-End & Database Development*

Personal Project 2025

- Developed server-side application logic using C# and ASP.NET/ASP.NET Core, enabling dynamic data handling and communication between front-end and database layers.
- Designed and implemented relational database schemas in SQL Server, including a Student Management System with Students, Courses, Teachers, and Enrollments tables.
- Applied Primary Key and Foreign Key constraints to maintain data integrity and referential consistency across related tables.
- Performed CRUD (Create, Read, Update, Delete) operations and wrote optimized SQL queries to retrieve, insert, and manage application data.
- Used SQL Joins, Aggregate Functions, GROUP BY, HAVING, and Subqueries to analyze and extract relational data efficiently across multiple database projects.

## EDUCATION

- **Bachelor of Computer Applications (BCA)** – Allahabad State University | 2025 (*Pursuing*)
- **Class 12 (Senior Secondary)** | Passed in 2025
- **Class 10 (Secondary)** | Passed in 2023
